

OSMO One Coat Only HS

- For indoor and outdoor use
- Transparent — satin-matt
- Applies with one coat
- Extremely high solids content
- Available in 16 colors
- 1 liter covers 175-275 s.f.

OSMO One Coat Only HS is a transparent, satin-matt and microporous wood finish for exterior and interior use. Just one thin coat is sufficient to obtain optimum surface protection and a beautiful, lasting finish.

The product is manufactured on a base of sustainable plant oils that have a particularly high penetrative capability. The grain and structure of the wood is accentuated.

OSMO One Coat Only HS will not crack, flake, peel, or blister. Renovation is easy: simply clean the surface and paint over (minimal sanding may be necessary for old finishes).

This product is water repellent, controls moisture, and reduces swelling and shrinkage. It allows wood to breathe, keeping it healthy.

OSMO One Coat Only HS can be reapplied without leaving visible brush marks and will not dry during the application process. It is suitable for all timbers and can be recommended for renewing old micro-porous finishes.

OSMO Wood Wax Finish Transparent

- For interior use
 - Transparent — satin-finished
 - Excellent furniture finish
 - Water repellent & dirt resistant
 - Resistant to common household cleaners
 - Can be used in rooms prone to dampness
 - Available in 13 colors
 - 1 liter covers 150-200 s.f.

OSMO Wood Wax Finish Transparent is a clear or transparent wood finish for interior use. The surface of the wood receives a satin finish and becomes extremely durable.

Its natural sheen can be enhanced by light polishing with any polishing pad.

Timber treated with Wood Wax Finish is ideal for use in rooms with high air humidity, such as bathrooms and kitchens. The finish is water-repellent, dirt-resistant, and non-abrasive.

Multiple colors may be mixed or layered on wood to provide a custom color finish.

OSMO Wood Wax Finish Transparent can also be used as a colored base coat on flooring if covered with another more durable sealant.
